

INLINE FILTER UNIT

The Baynflax Cambridge Range Inline Filter has been designed for the filtering of chocolate and other hot or cold materials.

The Filter units provide the following benefits:

- Simplex Filter for either floor or pipeline mounting
- Duplex Filter floor mounting with either manual or automatic changeover
- Large Filtration Area
- Low Pressure Operation
- Jacketed Body for incorporation with hot water circulation systems.
- Pressure Safety System provides either visual/audible alarm or initiates auto changeover and stops feed pumps.
- Minimum Changeover Time is facilitated with the instantaneous changeover afforded with Duplex Filter.
- No Spanners or keys
- 2" or 3" sizes
- Throughput up to 21 tons per hour
